## THE NUTRI-SPEC LETTER

**Volume 30 Number 3**

From:

Guy R. Schenker, D.C.

March, 2019

Dear Doctor,

There are a broad array of reasons why you and other Health Care practitioners were initially attracted to NUTRI-SPEC ....

- Ideally, the attraction has something to do with the concept of objectivity in clinical practice.
- Ideally, it has something to do with identifying and treating the causes of disease, rather than treating the symptoms.
- Ideally, it has to do with improving our patients' health, while the demons insidiously attacking their health are still in the patho-physiological stage --- not yet clinically pathological.

One major attraction --- that has brought many, many doctors to NUTRI-SPEC in the past few years is the ....

### **SINGULARLY AMAZING ....**

trio of **IMMUNO-SYMBIOTIC** products we offer. Each Immuno-Synbiotic rates as "World Class" in terms of its synergistic combinations of probiotic species --- plus the most advanced technology in probiotic manufacturing --- protecting the product shelf life, as well as its resistance to stomach acid and bile degradation.

And with three different Immuno-Synbiotics, a whole new dimension is added to the restoration of healthy microbiota --- each product addressing a patient-specific set of ImmunoNeuroEndocrine stressors. --- Truly --- when

Immuno-Synbiotic is offered to a patient along with an individualized **Diphasic Nutrition Plan**, there is absolutely nothing any of the Alternative Medicine Men can offer that competes with the power you have to reduce INE stress, and thus bring INFLAM-AGING under control.

----- The only clinical protocol more powerful than Immuno-Synbiotic administered with a Diphasic Nutrition Plan (initiated with the BALANCING PROCEDURE, of course) is to juice up that DNP with either ....

- your Sympathetic/Parasympathetic Support System Analysis, or,
- your Tissue Acid/Alkaline Balancing Analysis, or,
- with complete NUTRI-SPEC Metabolic Testing.

As a NUTRI-SPEC practitioner, you can easily ....

### **HITCH A RIDE ON A SHOOTING STAR ....**

the power that comes from understanding ....

### **ADAPTATIVE CAPACITY = METABOLIC BALANCE + VITAL RESERVES.**

Once you have grasped that concept, then each of your patients continuously tickles your brain with the question of ....

### **BIOLOGICAL INDIVIDUALITY ....**

We have all wondered why (and with NUTRI-SPEC you begin to see the answers clearly) --- some people are so robust and energetic even into their 70s and 80s, while others look and feel “old” while still in their 50s and 60s --- and others even in their 20s, 30s and 40s are being dragged down by ImmunoNeuroEndocrine stress. With NUTRI-SPEC you see the answer to this question day in and day out.

Just think of the potential for high-vitality living available in their 70s and 80s for patients you reach when they are in their 50s. Imagine the richness of spending middle-age on top of the world, when you reach patients early --- in their 20s, 30s and 40s.

Contemplate these few examples of people **Living Stronger Longer ....**

- Astronaut John Glen returned to space at age 77.
- Julia Child had her T.V. debut at age 51 and wrote a cookbook at age 87.

- Frank Lloyd Wright was still working at age 91.
- Ronald Reagan was elected to a second term at age 73.
- Doctor William Mayo founded Mayo Clinic at age 70.
- Robert Marchand set a new World Record for his age group by bicycling nearly 17 miles in one hour. --- The gentleman was 102 years old.

What makes the difference for such people? Are they merely the quantitatively insignificant portion of the population “born” to be superstars? ----- To be sure, genetics played a role in the vibrant life expressed by these people. But in the relative contribution of nature vs. nurture --- it is nurture that makes the bigger difference in almost all cases.

We as NUTRI-SPEC practitioners can imagine that all these people had at least a reasonably healthy microbiota (--- which you can give to all your patients with Immuno-Synbiotic). We can also assume that none of them suffered the inflammatory effects from significant Metabolic Syndrome or even Insulin Resistance (inflammatory reactions that you can control, even in those who have been guilty of over indulgence, with your amazing NUTRI-SPEC ADAPTOGENS --- IMMUNO-SYMBIOTIC + ADAPTO-MAX + OXY-MAX + OXY TONIC &/or OXY D+ &/or ELECTRO TONIC). --- And if these geriatric high achievers were Insulin Reactors, they kept it under control by not over-indulging in carbs and sugars.

For any of your patients who are suffering pathology --- you can add immeasurably to their quality and length of life with Immuno-Synbiotic (--- for all your patients), plus the appropriate items from your Treasure Chest of ADAPTOGENS.

For any of your patients who are being beaten down by patho-physiology --- you can restore the amazing level of health they were afraid they had lost forever --- and do it with nothing more than an individualized DNP, perhaps supercharged with your Sympathetic/Parasympathetic Support System Analysis, &/or your Tissue Acid/Alkaline Balancing Analysis.

And for those of your patients who are already vibrantly alive --- you can feed their robust bodies and dynamic minds --- awarding them decades of joyful living.

Here is an interesting story to illustrate just how amazing is your power ....

What does it mean when the Food and Drug Administration (FDA) grants Fast Track status to a drug that is under development and undergoing Phase 1, 2 or 3 trials? It means that the FDA sees so much potential in the drug that

it grants the pharmaceutical company the right to bypass many of the tedious and time-consuming regulations ordinarily imposed on the drug approval process. --- That fast track designation was announced on March 21, 2018 for a drug under development by Fennec Pharmaceuticals, a specialty pharmaceutical company working on a new drug to treat a condition for which there are no drugs currently approved, nor any other drugs even under development ....

What does this drug do? Cisplatin is a common and essential chemotherapeutic drug --- and the only treatment option --- for many childhood malignancies. However, as beneficial as Cisplatin may be, the survivors of pediatric cancer almost all suffer one terrible side effect. They all suffer hearing loss, and many of them go deaf. Fennec has a drug under development that shows remarkable benefits in preventing Cisplatin-related ototoxicity in pediatric cancer patients.

10,000 children each year receive platinum-based cancer chemotherapy. Hearing loss is suffered by most of the cancer survivors, and those children, particularly the infants and very young children who have not yet developed speech, are impaired for life --- not just because of the obvious hearing loss, but because language development and literacy are impaired. And in older children and adolescents, social-emotional and educational achievement are adversely affected.

No more than a week after announcing Fast Track status, on March 27, 2018, Fennec Pharmaceuticals received Break Through Therapy designation for their new drug. That designation reflects an FDA recognition of the promising efficacy and safety of this means to prevent deafness in children --- and recognizes the lack of any other safe, effective treatment.

Then, on December 20, 2018 Fennec Pharmaceuticals submitted a new drug application to the FDA for their compound that has now been granted Fast Track, and Breakthrough Therapy, and Orphan Drug status by the FDA. ----- Final approval of the drug is expected in the second half of 2019.

How does this drug work to protect the deafness that occurs in up to 90% of Cisplatin-treated children? When administered 6 hours after Cisplatin, it inactivates the toxic by-products of Cisplatin --- the toxic compounds that cause the hearing loss. --- What an amazing ADAPTOGEN!!! What incredible detoxification capacity!!! --- How complex must this compound be that offers such unmatched protection against chemical toxins?

----- Actually, this miracle “drug” is not complex at all, and in fact, it is entirely natural. --- And --- you will be pleasantly surprised that you have this very ADAPTOGEN/DETOXICANT in your NUTRI-SPEC Treasure Chest of supplements.

- You are giving it to almost all your patients on your Diphasic Nutrition Plan;
- You are recommending it to many of your patients whom you are monitoring with your Sympathetic/Parasympathetic Support System;
- You are giving it to all your patients who have an Anaerobic Imbalance;
- You are also giving it to many of your patients with Ketogenic or Sympathetic or Electrolyte Stress Imbalances. It is none other than ....

### **YOUR OXY TONIC.**

How can that be?!!! Quite simply --- the biochemists and molecular biologists at Fennec discovered the same physiological truth that Revic discovered way back in the 1950s --- that the naturally occurring thiosulfate ion (negative valence sulfur) is practically unmatched in its capacity to assist in detoxification, and to protect cellular membranes --- all the while balancing tissue pH.

How does this pharmaceutical company “get away with” getting FDA approval for your Oxy Tonic --- and making zillions of dollars from it? The trick is that they make a minor alteration in the molecular structure of the sodium thiosulfate (Oxy Tonic), such that they can get a patent on the molecule (whereas they could not patent the natural form of sodium thiosulfate you use in your Oxy Tonic). ----- Think about it --- while you may not make “millions” --- you will ....

### **EARN PROSPERITY BEYOND YOUR SWEETEST DREAMS ....**

when you routinely start all your patients on the BALANCING PROCEDURE with Oxy Tonic as the first step in their individualized ....

### **LIVE STRONGER LONGER ....**

#### Diphasic Nutrition Plan.

You will join the NUTRI-SPEC practitioners who earn hundreds of thousands of \$\$\$\$\$ each year. But just as sweet as the \$\$\$\$\$ will be the praise you receive from your patients, plus the satisfaction of knowing you have a Treasure Chest containing the power to add real value to your patients' lives.

----- Where else in your NUTRI-SPEC TREASURE CHEST of ADAPTOGENS do you find the amazing longevity-enhancing miracle of negative valence sulfur? --- In none other than ....

**TAURINE ....**

the incredible protector against ....

1. Cardiovascular Disease
2. Immune System failure
3. Multiple Chemical Sensitivities
4. high triglycerides and cholesterol
5. premature aging of structural and functional proteins
6. nearly every inflammatory condition imaginable
7. Excess Nitric Oxide
8. Chronic Fatigue
9. Fibromyalgia
10. Dementia

“Treasure Chest”? --- Yes, there is no greater treasure than health. So imagine --- how simply you can get dozens and dozens of patients on their individualized Diphasic Nutrition Plan. Imagine bringing the precious treasure of high vitality ....

**LIVE STRONGER LONGER ....**

richness --- in place of INFLAM-AGING. Imagine both the gratification and \$\$\$\$ that will enrich your life. Immuno-Synbiotic, Oxy Tonic, Electro Tonic, Adapto-Max and Oxy-Max are the Secret Treasure you own.

Do your patients know you are the only doctor who possesses such extraordinary treasure? Tell them!!! Tell them about your Oxy Tonic treasure and how it is so powerful that the drug industry is patenting it to cure deafness from cancer drug toxins. Give them (all, or a portion of) the Taurine write-up from your Extraordinary Nutrients Article on the website.

[Apology for our carelessness: In the past 2 Letters we encouraged you to print out that comprehensive Taurine Article --- give it to patients, and have copies available in your waiting room. Only in the past month did we realize we hadn't posted the expanded Article on the website.]

Your patients are going to the health food store and to Alternative healthcare cure peddlers looking for the answer to INFLAM-AGING. It is your Treasure Chest that holds the secret to vitality.
