THE NUTRI-SPEC LETTER

Volume 30 Number 10

From:
Guy R. Schenker, D.C.
October, 2019

WHY TODAY?

Dear Doctor,

WHY NOT YESTERDAY?

WHY NOT TOMORROW?

Suppose a new patient comes to you with Rheumatoid Arthritis, after suffering 10 years of crippling inflammation --- associated with catabolic/oxidative/Dysaerobic Stress. As you know, RA is one of the nastier Th1-mediated auto immune diseases. You are not surprised that the patient has taken Methotrexate (an immune system suppressor) for years --- and still must occasionally resort to taking Prednisone to control the extreme flare-ups that occur FOR NO APPARENT REASON from time to time. ----- As a NUTRI-SPEC practitioner, you are probably also aware that RA is associated with both a Prostaglandin-Nitric Oxide Imbalance and a Dysaerobic Imbalance.

In her History, the patient reports that she can go days or weeks with tolerable pain, but then OUT OF NOWHERE will be hit with a day or two, or a week or two of unbearable inflammatory agony. What is the patient telling you? --- Plug your brain into your NUTRI-SPEC paradigm and think this through

You know that inflammatory pain is one of the

Dualistic Symptoms.

Dualistic Symptoms are manifestations of an Acid/Alkaline Imbalance at the Tissue Level of biological organization. --- Dualistic? --- That means either an

excess Tissue Acidity or Tissue Alkalinity will exacerbate pain (or any of the other dualistic symptoms such as vertigo, allergies, itching, depression / anxiety, insomnia/somnolence, and many others). So, what is triggering your RA patient's flare-ups? Simply --- some environmental stressor has pushed the Tissue Level chemistry into an Acid/Alkaline Imbalance.

Why, as your patient sits in your office giving her history, does she report an excruciating hot swollen painful reaction in her wrists that began --- FOR NO APPARENT REASON --- evening before last? --- Mystery? Possessed by demons? Just one of those things? --- Ask yourself, within the context of your NUTRI-SPEC paradigm, what happened that evening to light up this poor woman's agonizing pain?

----- Actually, it is no mystery at all. Day before yesterday a high pressure front moved through your area. Increasing barometric pressure is one of the environmental factors that pushes a patient Dysaerobic (increases serum potassium, decreases cellular potassium, and makes cell membranes more permeable as the Tissue Level compartment of body fluid becomes more Alkaline, even as systemically the patient shifts more Acid).

No mystery at all. --- The pain of Rheumatoid Arthritis is Dysaerobic/Alkaline in character. Your RA patient will always feel worse when the barometric pressure rises, and will inexplicably have symptoms relieved when the barometric pressure drops. Why does this woman report that her pain is often worse in the evening? Why does it tend to be worse in winter than in summer? Why is her inflammation always worse when she is short on sleep?

----- No mystery at all

Our body chemistries are most Dysaerobic in the evening; our body chemistries tend to shift in a Dysaerobic direction during winter; our body chemistries shift into Dysaerobic Tissue Alkalosis whenever we are sleep deprived.

Can you offer this Rheumatoid Arthritis patient significant improvement in her symptoms? Absolutely yes. But more importantly --- can you offer this RA patient significant improvement in the ImmunoNeuroEndocrine Stressors underlying her pathology? Absolutely yes! That is the key

You may not "cure" RA, but you can make this patient almost invincible to the environmental stressors that exacerbate the underlying Metabolic Imbalance, and precipitate inflammatory symptoms. By supplementing this patient with Oxygenic D, Oxygenic D+, IS Immune X-Flam, and Glutamine --- and getting good compliance on the Dysaerobic and Prostaglandin-Nitric Oxide dietary recommendations --- she will remain on a even keel --- week after week, month after month, with minimal flare-ups. ----- The need for Methotrexate may even be obviated. The use of Prednisone will be a thing of the past. Pain

will be quite well controlled with intermittent use of an anti-inflammatory such as Ibuprofen, or perhaps something as strong as Mobic on occasion.

The quality of this person's life will be saved --- as she will **Live Stronger Longer**.

How about your Fibromyalgia patient whose suffering becomes disabling every time a change in barometric pressure causes a shift toward Tissue Acidosis or Alkalosis ----- or, your Chronic Fatigue patient who is wiped out every time the mold count increases such that the brain shifts Acid/Alkaline at the Tissue Level ----- or, your migraine patient who hides in a darkened bedroom for 2 days every time a slight excess of dietary PUFA vegetable oil pushes Tissues either Acid or Alkaline?

The solution to your patients' suffering? The "trick" you can always use on every patient to control the weird array of symptoms triggered FOR NO APPARENT REASON? --- The key to minimizing dualistic symptoms seeming to come OUT OF NOWHERE?

----- Your BALANCING PROCEDURE is the "secret" to increasing ADAPTATIVE CAPACITY such that your patients are protected from

INVISIBLE TRIGGERS.

It all comes down to the power of your -----

METABOLIC SPARKS

----- Electro Tonic & Oxy D+ & Immuno-Synbiotic X-FLAM, & Glutamine (& sometimes Phos Drops and Proton Plus) = for all Dysaerobic/Alkaline dualistic symptoms.

----- Oxy Tonic & Taurine & Immuno-Synbiotic Immune Power (& sometimes baking soda) for Anaerobic/Acid dualistic symptoms.

----- Adapto-Max (Diphasic A.M.) & Oxy-Max (Diphasic P.M.) & Immuno-Synbiotic & Taurine or Glutamine = for breakdowns in ADAPTATIVE CAPACITY at the Cellular Level of biological organization that underlie Tissue Level Acid/Alkaline Imbalances.

----- Adapto-Max & Oxy-Max & Immuno-Synbiotic & Taurine or Glutamine & Phos Drops or Proton Plus or Electro Tonic or baking soda = for Systemic Level Imbalances stressing the Tissue Level maintenance of Acid/Alkaline Balance.

These Metabolic Sparks are your anti-inflammatory, anti-INFLAMMAGING ImmunoNeuroEndocrine stress reducers that make a mockery of Nature Cure silliness such as cinnamon and turmeric and Resveratrol and fish oil. ----- Yes, your Metabolic Sparks = Oxy Tonic, Electro Tonic, Oxy D+, Proton Plus, Phos Drops, and baking soda --- especially when backed up by Immuno-Synbiotic, Adapto Max, Oxy Max, Taurine, and Glutamine ---

Give you POWER

as the only Doctor who can instantly reverse Tissue Level Acidity/Alkalosis = Instantly impact pain that is triggered by “mysterious” environmental exposures.

Yes, your

BALANCING PROCEDURE

is the key, the “trick,” the solution to your patients’ suffering from dualistic symptoms ----- not the least of which is PAIN --- but also other Tissue Level dualistic symptoms as manifestations of Acid/Alkaline Imbalance --- including all your patients with Fibromyalgia, Chronic Fatigue Syndrome, Vertigo, Constipation/Diarrhea, Insomnia/Somnolence, Itching, Allergies, Depression/Anxiety, High/Low Cholesterol --- and on and on the conditions and symptoms go. --- ALL are manifestations of Tissue Level Imbalances created either by Cellular Imbalances ---

“BUBBLING UP”

or, Systemic Imbalances ---

CRUSHING DOWN

on all your patients’ --- straining their Adaptative Capacity to maintain Tissue Level Acid/Alkaline Balance --- the Tissue Level being where ALL these Dualistic Symptoms are manifest.

YOU

with your BALANCING PROCEUDRE --- have the supplements to control all these many symptoms/conditions from which your patients suffer. No doctor except you can offer

WITHOUT DRUGS

the easing of all those nasty nagging symptoms that seem to

COME OUT OF NOWHERE.

Focus your attention on your BALANCING PROCEDURE, and

USE IT!

Enjoy your power! Savor the adoration of your patients.

After your patients have completed the BALANCING PROCEDURE and thus determined the ideal ratio of Oxy Tonic &/or Electro Tonic &/or Oxy D+ to maintain an even keel of Tissue Acid/Alkaline pH swings --- and then maintained their BALANCING PROCEDURE supplementation for 6 weeks, ask your patients: (actually ask them) "Before you completed your BALANCING PROCEDURE, how often did you suffer from (migraines), and how often have you had them these last 6 weeks? And on a scale of 1 to 10, when you do get a migraine now, how does it rate compared to the migraines you used to have?" [--- Sometimes, in the absence of a total "cure," patients will not fully realize the extent of their clinical improvement unless you actually ask them to voice it.]

YOU WILL BE AMAZED!

YOU WILL BE PHENOMENALLY GRATIFIED.

YOU WILL BE RICH.

90% of your patients will begin their BALANCING PROCEDURE doing a saturation to bowel tolerance with Oxy Tonic. So --- let us make sure you fully appreciate just how amazing is your extraordinary negative valence sulfur supplement. First, consider that no one else except NUTRI-SPEC practitioners offer a thiosulfate supplement. How important is thiosulfate?

- Sodium thiosulfate has a long, long history of use in food manufacturing. Many foods are made with sodium thiosulfate as an antioxidant to preserve the fats in the food.
- Sodium thiosulfate functions equally well as an antioxidant nutrition supplement. It provides

SULFHYDRYL GROUPS ---

the most important antioxidant in the human body.

- Another clinical benefit of sodium thiosulfate is that it has specific anti-Candida action.

- Additionally, your Oxy Tonic has a long history of medical use: It is used as an antifungal, as an antidote for cyanide poisoning, and to prevent calcification of arteries. In fact, sodium thiosulfate is on the World Health Organization's List of Essential Medicines.
- In your March 2019 Letter, we highlighted what an amazing ADAPTOGEN your Oxy Tonic is, and, its incredible detoxification capacity. As you learned, a "miracle drug" for which the FDA has given fast track approval status to Fennec Pharmaceuticals ---- is nothing more than your Oxy Tonic, with the molecule modified ever so slightly so that the drug company can get a patent on it. The FDA is so excited about Fennec's clinical studies because sodium thiosulfate is the only supplement/"drug" to prevent the deafness that occurs in virtually all children who undergo chemotherapy for cancer. ----- Yes, sodium thiosulfate gives you and your patients unmatched defense against chemical toxins. Your Oxy Tonic may be the absolute most important ADAPTOGEN/DETOXICANT in your NUTRI-SPEC Treasure Chest of supplements.

Do you see why Oxy Tonic is the first step in your BALANCING PROCEDURE? Do you see why you want ALL your patients to have the benefit of sodium thiosulfate in just the right quantity for their specific body chemistry, and in perfect balance with the other tissue-level active supplements, Oxy D+ and Electro Tonic? All Fennec rediscovered is the same physiological truth that Revici discovered way back in the 1950s --- that the naturally occurring thiosulfate ion is practically unmatched in its capacity to:

- assist in detoxification
- protect cellular membranes,
- balance tissue pH.

It is this balancing of tissue pH that makes it a critical component of controlling your patients' dualistic symptoms.

Can you imagine any better way to help your patients

LIVE LONGER STRONGER

than giving them your BALANCING PROCEDURE?

Patients suffering pain? Vertigo? Itching? Any of the nasty dualistic symptoms? Symptoms that flare up FOR NO APPARENT REASON? Rescue your patients --- with your Metabolic Sparks. "Miracles" are within your power.
