THE NUTRI-SPEC LETTER

Volume 33 Number 2

From:
Guy R. Schenker, D.C.
February, 2022

Dear Doctor,

With NUTRI-SPEC, you are ...

A SPELUNKER & A DEBUNKER

How is it you can proudly call yourself a “spelunker”? ----- Through your NUTRI-SPEC Analysis procedures you are exploring the deep, dark depths of the metabolic pathways driving the symptoms that bring every patient into your office. No other healthcare provider can match the penetration and specificity with which you probe the underlying causes of pain, weight gain, depression/anxiety, vertigo, high cholesterol --- you name it --- if your patient has it, YOU can go far below the surface to find the causes.

We talk endlessly about ImmunoNeuroEndocrine Stress --- and how all those INE stresses lead to inflammation --- and further, how chronic inflammation causes ...

INFLAM-AGING.

All those INE stresses are the deep, deep causes of dis-ease. As a NUTRI-SPEC spelunker you are totally at ease exploring the Metabolic Imbalances that remain a mystery to all those superficial alternative healthcare providers.

What makes your NUTRI-SPEC clinical protocols so valuable --- and you such an accomplished spelunker --- is that you do not need to spend years exploring and studying caves, yet, you are right at home in the mysterious subterranean streams that flow through all your patients. Indeed, you need not even know the difference between a stalactite and a stalagmite --- because your NUTRI-SPEC procedures sort it all out for you. The analysis --- and the uniquely powerful supplements ---

ARE ALL BUILT IN TO NUTRI-SPEC FOR YOU.

INE Stress? Inflammation? ----- Are you stuck on the surface with all the natural cure peddlers --- offering nothing more than superficial remedies --- when the ultimate causes of your patients' major complaints are bubbling up from deep under the surface?

Do the non-specific remedies offered by alternative medicine specifically address imbalances in cellular membrane permeability as your NUTRI-SPEC procedures do? Of course not.

Do their heavily hyped nature cure "anti-inflammatories" address the specific INE stresses that cause that inflammation as your NUTRI-SPEC procedures and supplements do? Of course not.

Does your health food industry "Flavor Of The Month" penetrate deeply into cellular energetic processes, developmental processes, and regenerative processes as do your NUTRI-SPEC Adapto-Max, Oxy-Max, Oxy Tonic, Oxy D+ and Electro Tonic? Of course not.

So now, do you see how being a spelunker also makes you a "debunker"? You can be fully confident that you are penetrating deeply into Metabolic Imbalances at the cellular level. You can be totally confident (even arrogant!) in pointing out the folly of chasing symptoms with "natural" remedies.

Is cinnamon truly anti-inflammatory? You can assure your patients that claim is false (saving them much money and frustration), while at the same time you can (as we have in past issues of this Letter) totally debunk the cinnamon myth. Familiarize yourself (read your Letters from October, 2017 <https://nutri-spec.net/wp-content/uploads/2019/09/2017-10.pdf> & February, 2019 <https://nutri-spec.net/wp-content/uploads/2019/09/2019-02.pdf>) with the cinnamon fraud, and ---

**EXPLAIN IT (with confidence and a bit of
“know it all” attitude) TO YOUR PATIENTS.**

Is Resveratrol truly the “cure all” hyped by the health food industry and pushed by “holistic” doctors? No, and with NUTRI-SPEC you can totally debunk that claim, as we have done in past Letters, and as is written up in one of the many informative articles on your NUTRI-SPEC website <https://nutri-spec.net/wp-content/uploads/2019/09/resveratrol.pdf> ----- It is shown beyond a doubt that Resveratrol has one effect on cell cultures, another effect when injected in test animals, yet another effect when taken orally by test animals, and yet still other (and quite variable) effects when taken orally by humans. Are the unpredictable “benefits” of Resveratrol a mysterious paradox?

No --- any NUTRI-SPEC spelunker knows that the effects of Resveratrol are entirely dependent on each individual’s deeply rooted INE stresses --- and the capacity of each individual’s immune system to metabolize Resveratrol.

And that capacity is almost entirely dependent on the patient’s microbiota. Don’t let your patients waste money and invest their hope on Resveratrol. Give them the Immuno-Synbiotic they need! Resveratrol is superficial --- and underlying Fundamental Metabolic Balance systems are unknowable to those who do not have the ability to dig as deeply as you can with NUTRI-SPEC.

----- Truly, the lipoic acid, carnosine, and chondroitin sulfate in your Adapto-Max each put Resveratrol to shame in their capacity for reaching deeply into the INE stresses underlying inflammation, and ultimately INFALM-AGING --- and ...

ALL THE SYMPTOMS THAT BRING PATIENTS INTO YOUR OFFICE.

----- With NUTRI-SPEC, you touch your patients deeply. ----- And, what is the most effective way and the quickest way you can probe the INE stresses that remain a dark mystery to other doctors? How can you directly intrude upon the vicious cycles (positive feedback loops) = INE Stress causing Metabolic Imbalances --- then, Metabolic Imbalances creating new INE stresses ----- back and forth in an ever escalating whirlwind of patho-physiology --- that eventually erupts through the surface as symptoms of dis-ease?

Recalling last month's Letter --- you know I am referring to your ---

BALANCING PROCEDURE.

You were introduced to the incredible research of du Preez --- showing that thiosulfate (as provided in high concentration in your Oxy Tonic) is the critical component of most important functions of the immune system, and tissue function in virtually every organ of the body. Everything from membrane permeability to antioxidant power to energetics depends upon thorough sulfation (with Oxy Tonic) of heparin sulfate as part of the glycosaminoglycan (GAG) compounds that determine both the structure and function of tissue membranes throughout the body.

After reading some of the conclusions from du Preez's incredible work, you should have been asking yourself, "Do I want to restore structure and function to tissues throughout all my patients' epithelial, endothelial and other tissue membranes with Oxy Tonic (and other NUTRI-SPEC supplements) --- or --- do I want to be an alternative healthcare provider of "remedies" based upon "research" that is a little more than propaganda?"

Yes, there is more power in your BALANCING PROCEDURE than in the entire pharmacopeia of "natural" medicine, or in all the countless bottles of nonsense that fill the shelves of your local health food store.

Let us take a little more comprehensive look at one aspect of du Preez's research --- the effects of your Oxy Tonic on Cardiovascular Disease ...

The thiosulfate (Oxy Tonic) compounds are especially pronounced on both epithelial and endothelial (arterial) membranes. Plasma proteins such as albumin, fibrinogen and antithrombin are also bound within the endothelial tissue. Looking at the arterial intima specifically, we see how crucial is the dependence of these tissues on the presence of thiosulfate.

When there is adequate sulfation of the arterial intima, your patients will have perfect functional interplay between the thiosulfate of the membrane and these plasma proteins that are essential for vascular health --- and the interplay with fibrinogen and antithrombin that is critical to prevent what you as a NUTRI-SPEC practitioner know as ELECTROLYTE STRESS IMBALANCE.

Thiosulfate (Oxy Tonic) therefore plays an essential role in maintaining and regulating a wide range of functions, including ...

- vascular permeability
- coagulation activity
- inflammatory responses
- and in relation to vascular permeability, coagulation, and inflammation --- as major causes of dangerous crises in Covid --- viral entry into target cells.

The number of thiosulfate groups in various domains of the arterial GAGs determines the binding affinity to fibrinogen and anti-thrombin --- the critical proteins involved with heart attacks and strokes.

The degree of sulfation (supplied by Oxy Tonic via The BALANCING PROCEDURE) predominantly determines the negative charge of the membranes --- which defines pathogen invasion, receptor binding sites, and the electrostatic binding of proteins --- including albumin, leukocytes, red blood cells, and platelets.

You can see a nice summary comment in this direct quote from Preez: “It is important to note that sulfation reactions in the human body affect all cells, and metabolism of many endogenous and exogenous molecules, such as hormones, drugs, and xenobiotics”.

The maintenance of oncotic pressure is another fundamental aspect of your Water/Electrolyte Imbalance Analysis. Disruption of membranes by inadequate sulfation leads to loss of barrier function with subsequent edema formation. It can also cause the loss of albumin in the urine that you pick up with your multistix test strip.

Properly sulfated membranes are crucial for the maintenance of vascular barrier functions and fluid dynamics. An essential function of sulfated membranes is maintaining correct oncotic pressure in the capillary bed, in addition to facilitating the absorption and reabsorption of molecules across capillary membranes.

This concept of membrane permeability has been the very foundation of NUTRI-SPEC for 40 years. The balance between Oxy Tonic, Electro Tonic, and Oxy D-Plus --- MAINTAINED ON AN INDIVIDUAL BASIS for each of your patients --- is essential for selective membrane permeability.

MAINTAINED ON AN INDIVIDUALIZED BASIS? ----- How? ----- With your BALANCING PROCEDURE, of course. All your patients need the benefits derived from maintaining Metabolic Balance between Oxy Tonic, Electro Tonic & Oxygenic D+. Add Activator + Immuno-Synbiotic --- and there is nothing more important you can do to assure all patients they will ---

LIVE STRONGER LONGER.

Your BALANCING PROCEDURE to individualize Metabolic Balance --- simple, inexpensive and applicable to all your patients?

Restore membrane permeability?

Break the viscous cycles between INE Stress ← → Metabolic Imbalances?

Break the viscous cycles between INE Stress ← → INFLAM-AGING?

Control the deadly imbalances of fibrinogen & anti-thrombin that drive Electrolyte Stress Imbalance?

Restore capillary membrane integrity that breaks down in both Electrolyte Stress & Electrolyte Insufficiency Imbalances?

----- Yes, your BALANCING PROCEDURE is ...

INDISPENSIBLE!

So --- this month's special = 2 bottles **FREE** with every 10 you buy of both Oxy Tonic and Oxy D+, and Electro Tonic.
