

IMMUNO-SYMBIOTIC

This product features:

A unique proprietary blend of probiotics. Immuno-Synbiotic is not offered as a “treatment” for any disease. But, scientific research shows that they:

- Increase Bifidobacteria species, the most populous probiotics in the human gut †
- Benefit development of normal microbiota in children †
- Benefit immune development in infants and young children †
- Increase immune-modulating butyrate †
- Particularly benefit inflammatory conditions of the gastrointestinal tract †
- Help control excess immune system Th1 inflammatory cytokines †
- Increase intestinal production of Secretory Immunoglobulin A †
- Beneficial during and after taking antibiotics †
- Decrease the metabolic stress associated with stress hormones such as cortisol & adrenaline †
- Improve mineral absorption and maintain bone density †
- Benefit all the effects of Metabolic Syndrome, including weight gain, elevated cholesterol, and atherosclerosis †

Glucomannan + Inulin = the two most potent prebiotics. Scientific research shows that they:

- Benefit all immune-related inflammatory and allergic conditions, and decrease autoimmune disease antibodies †
- Increase immune-modulating butyrate better than any other dietary fiber †
- Benefit irritable bowel, and all other intestinal inflammatory conditions †
- Improve absorption of calcium, magnesium, and trace minerals †
- Improve intestinal detoxification †
- Benefit high blood sugar, aid in controlling insulin, and increase insulin sensitivity †
- Decrease body fat percent †
- Decrease triglycerides and decrease LDL cholesterol without decreasing HDL cholesterol †
- Increase the population of beneficial intestinal microbiota †
