THE NUTRI-SPEC LETTER

Volume 35 Number 08

YOU'VE GOT IT! -----

With Objective Proof ...

From:

Guy R. Schenker, D.C.

August 2024

Yes, you've got it --- and no other Alternative Health Care practitioners can match what you offer your patients. ----- Truly, you hold in your hand the key that unlocks ---

THE MYSTERY OF INFLMA-AGING.

Your SOLID (Stage Of Life INFLAM-AGING Defense) is a life-long, individualized nutrition plan offering you everything the science of Gerontology now reveals as the only nutrition approach to aging.

OBJECTIVE PROOF?

Gerontologists have given us the key. They identified a select group of nutrients, along with some repurposed medicines, that have specific effects on “the causes of the causes” of INFLAM-AGING. Gerontologists named these

therapeutic agents proven to improve both quality and length of life as “Rejuvenins”.

There are 5 Rejuvenin nutrients (--- and 5 repurposed drugs) that make the “Top Ten” effective in ameliorating the core causes of the symptoms you see in your patients every day. Those Rejuvenins include:

- Carnosine
- Alpha Lipoic Acid
- N-Acetyl-Cysteine combined with Glycine
- Quercetin.

Are inflammatory cytokines pushing your patients down the path of INFLAM-AGING – creating the pain and other symptoms that drive them to you for help? Gerontology research shows you can help ...

Yes, you have objective proof. Compared to younger subjects, older adults show extreme elevation of many pro-inflammatory cytokines at baseline ...

- IL-6 = 934% higher!!!
- TNF- α = 116% higher
- C-reactive protein (CRP) = 88% higher
- Endothelial biomarkers of inflammation can be 175% higher

Supplementation with a blend of Rejuvenins lowered IL-6 by 77%, TNF- α by 57%, and CRP by 49% --- and decreased insulin by 55% and insulin resistance by 59% (!!!)

That power is yours to use.

----- There you have it. And there is much, much more objective proof in the research literature. Below we give you some specific instances of Case Studies from Nutri-Spec practitioners showing amazing objective responses to their use of your SOLID Plan on some very, very sick patients.

As you have recently learned from your Nutri-Spec study, there are actually two distinctly different aging pathways ...

- One is aging “from the outside in” (--- what Nutri-Spec has termed Exogenous INFMAM-AGING)
- The other is aging “from the inside out” (--- what we Nutri-Spec practitioners call Endogenous INFLAM-AGING)

No one has ever been able to match the power you have with Nutri-Spec to defend against Exogenous aging. And Endogenous aging? Other alternative healthcare practitioners are not even aware it exists --- let alone have control over it --- as you --- and only you --- can offer your patients.

The Gerontologists’ elucidation of Exogenous and Endogenous INFLAM-AGING represents the long-elusive impossible dream ...

A UNIFIED THEORY OF HEALTH.

Historically, the dream of that idea was termed “A Unified Theory of Disease.” --- But now that Gerontology proves that “diseases” are really nothing more than a deficiency of “health defenders” --- ADAPTOGENS & REJUVENINS --- it is time for a change of perspective.

Your SOLID Nutrition Plan offers that new perspective. Your Stage Of Life INFLAM-AGING Defense recognizes the changing nutrition needs as we pass through life from childhood through adolescence through adulthood --- addressing those changing nutrition needs with each passing decade. Your SOLID also gives you control over the Immuno-Neuro-Endocrine Stresses that are causative in both Exogenous and Endogenous INFLAM-AGING.

The common ground between the two aging pathways largely involves ...

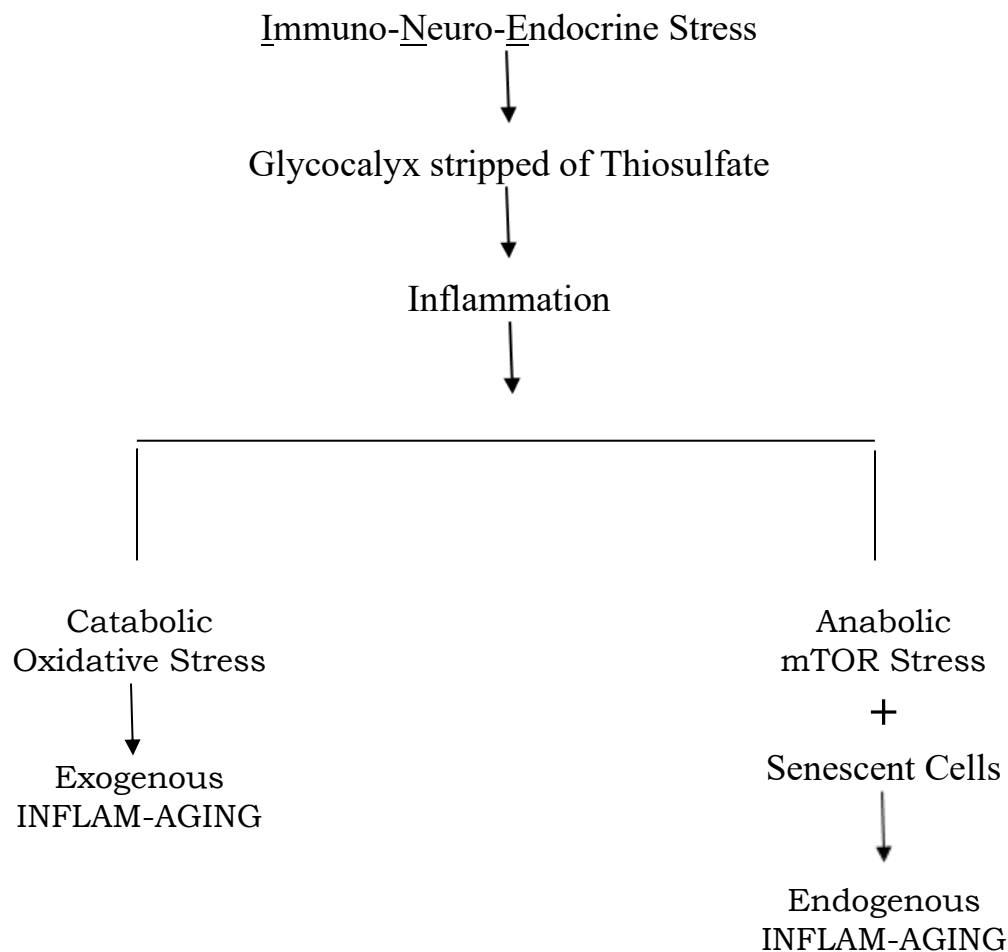

A BREAKDOWN IN THE GLYCOCALYX ...

the “membrane around the membrane” of every cell in the body. The common denominator that “UNIFIES” this Theory of Health, is that health can only be maintained if the Glycocalyx is thoroughly Sulfated. It is tissue membranes being stripped of Thiosulfate that allows cells to be overwhelmed by INFLAM-AGING.

A Glycocalyx deficient in Sulfur-derived protectors in the Glycocalyx itself, and the accompanying deficiency of Sulfur-containing Glutathione within the cells, leaves those tissues defenseless against both Exogenous and Endogenous INFLAM-AGING --- and --- can only be corrected by your SOLID.

Tissues depleted of Thiosulfate are subject to catabolic free radical oxidative damage --- the driver of Exogenous INFLAM-AGING.

Cells depleted of Glutathione are subject to mTOR-driven anabolic damage and Senescent Cells --- the forces behind Endogenous INFLAM -AGING.

With Nutri-Spec you not only have the power to control both the oxidative free radical damage of Exogenous INFLAM-AGING as well as the anabolic Biological Clocks driving Endogenous INFLAM-AGING --- but look higher up on the above flow chart. Your ultimate control of both aging pathways is achieved by addressing the cause of INFLAM-AGING before it even begins to progress.

Whether you are meeting the health needs of a 17-year-old, or a 67-year-old, you SOLID controls INFLAM-AGING in the early stages of inflammation by ---

RESTORING GLYCOCALXY SULFATION.

Every component of your SOLID specifically and thoroughly addresses the need to maintain tissue Thiosulfate --- and thus all the sulfur-containing Glycosaminoglycans and Glutathione.

It all begins with your BALANCING PROCEDURE --- to determine each patients' individualized need for the "Metabolic Sparks" --- Oxy Tonic, Electro Tonic, and Oxy D+. That alone achieves thorough saturation with Thiosulfate.

Then, consider that your Activator, Rejuvenator, Adapto-Max, and Oxy-Max are loaded with sulfur-containing Adaptogens and Rejuvenins --- including ---Taurine, Lipoic Acid, NAC, Chondroitin Sulfate --- along with other Rejuvenins such as Quercetin, Carnosine, and Benfotiamine.

----- Focus your attention on these clinical results showing your potential with SOLID:

- CRP (C-Reactive Proteins) (--- which is probably the best overall indicator of poor vascular health) in a Nutri-Spec Practitioner's patient after only 11 months of SOLID, plummeted from 4.57 to 0.43.
- A Doctor whose cancer patient after chemotherapy was in remission for more than a year --- but still very, very sick ... In less than 10 weeks her Serum Ferritin (--- an indicator of systemic inflammation and a specific indicator for Endogenous INFLAM-AGING) showed an astounding drop from 1,315 all the way down to 199. ----- That reading of over 1,300 may be the highest I have ever seen. The patient was in an extreme inflammatory state, and just that quickly it was almost completely under control with SOLID.

- Over a period of less than a year one Doctor's CVD patient showed amazing improvement in the Lipid Panel: HDL Cholesterol improved from a dangerous 27 up to 43. Oxidized LDL improved from 129 all the way down to 24. Triglycerides dropped from 233 to 143. That means the Triglyceride to HDL ratio (the #1 risk factor for heart attacks and strokes) improved from 8.6 to 3.4.
- One patient's Inflammatory Markers showed amazing improvement under Nutri-Spec care --- with the SED Rate dropping from 42 to 6 and the Serum Ferritin improving from 219 to 69.

Is there something you would rather do for your patients than to provide them a Stage Of Life INFLAM-AGING Defense?

----- Make it happen today --- by taking advantage of your August SPECIAL =
 = To replenish Thiosulfate to restore the Glycocalyx and Intracellular Glutathione
 --- 2 **FREE** with every 10 you buy of your BALANCING PROCEDURE
 supplements = Oxy Tonic & Electro-Tonic & Oxy-D+. This is the only way to
individualize each patient's SOLID.

And --- offer your patients the best from the science of Gerontology =
 Rejuvenator --- 2 **FREE** with every 10 you buy ---

- = Beneficial for patients age 23-33.
- = Important for patients age 33-42.
- = Essential for everyone age 43+.
- = Critical for everyone age 53+.

Only you --- with your SOLID Plan --- can control Immuno-Neuro-Endocrine
 Stress.

LIVE STRONGER LONGER.
