

NUTRI-SPEC

Live Stronger Longer

Nutri-Notes

June 23, 2023

What exactly is **INFLAM-AGING**?

There are 2 distinctly different processes ...

Aging from the outside-in (Exogenous INFLAM-AGING), which determines what Gerontologists call ---

Your HEALTH SPAN.

Aging from the inside-out (Endogenous INFLAM-AGING) which determines ---

Your LIFESPAN.

The difference? HEALTH SPAN refers to how many years you live well --- scoring high on conventional measures of good health.

LIFESPAN is the age at which you will die.

You have undoubtedly observed a paradox = seemingly healthy people who die in their 60s ---- and, people who look like death and suffer severe infirmity at age 65, yet live 'til 95.

You can control Endogenous INFLAM-AGING --- only one way ---

with **REJUVENATOR**.
