

*Live Stronger Longer*

September 8, 2023

### **“If you are going to stay current in the field of Clinical Nutrition...”**

“... you actually must make the term “Rejuvenins” the focus of your clinical efforts.” That is a quote from our article in the October issue of The American Chiropractor. You can continue to sell your patients last year’s Alternative Health Care flavors of the month --- or realize there is an entirely new paradigm. --- With Nutri-Spec you will lead the way.

Are you surprised by the price of your new, enriched Activator? As explained in the September Nutri-Spec Letter, the cost is not as high as it seems when you just look at the “sticker price”. The ADAPTOGEN- and REJUVENIN- enhanced formulation is such a powerful defense against both Exogenous and Endogenous INFLAM-AGING, most individuals only need 2 daily, which makes each bottle a 60-day supply.

We do recommend a REPLENISHING by taking the first bottle at the label recommendation of 4 daily --- then, reduce to 3, 2, or even one daily thereafter --- depending on both the health needs and the financial means of the individual.

But if finances are limited, go with 2 daily right from the start. ----- This product is so effective, even one daily provides value that cannot be had from anything else in the supplement market --- and 2 daily (when combined with Immuno-Synbiotic and Eat Well – Be Well) provides INFLAM-AGING defense that, as your September Letter explains, is a quantum leap in metabolic power --- and every Clinical Nutritionist’s dream come true. ----- Nothing can even be compared to it.

The enriched Activator more than replaces the old Activator. It supplies more ADAPTOGENS in defense against Exogenous INFLAM-AGING and enough REJUVENINS in defense against Endogenous INFLAM-AGING such that very few individuals under age 33 need Rejuvenator, since the need for protection against the steadily increasing aging from intracellular forces accelerates at the 33-42 Stage of Life.

--- Age 43 is when the Endogenous INFLAM-AGING that began taking over cellular metabolism at age 23 becomes an irresistible assault without the full protective effect of the REJUVENIN quantity in Rejuvenator. Activator, as powerful as its ADAPTOGENS are against Exogenous INFLAM-AGING, no longer supplies enough. To get the dramatic decrease in inflammatory cytokines such as TNF-alpha, Interleukin-6, Interleukin-2, Interleukin-1, Interferon-gamma, and C-reactive Protein highlighted in the Gerontology research, Rejuvenator is required.

----- But the triad of Activator 2 daily, Immuno-Synbiotic 3 daily, and Rejuvenator per Stage of Life --- is ALL that is required to build a fortress against Exogenous and Endogenous Aging. “SOLID”ly on that foundation, Metabolic Balancing with other Nutri-Spec supplements requires much less supplementation.
